

Small Capitalization Portfolio

THE PORTFOLIO:

Inception: January 1, 1994

Investment Style: Small Capitalization

Investment Management of Virginia's Small Capitalization Portfolio seeks an attractive total return through capital appreciation in a concentrated portfolio of small sized companies and exchange traded funds with small capitalization exposure. The portfolio managers purchase stocks that appear to be out of favor and are considered "on sale" by most market participants. General attributes of companies in the Portfolio will include modest price-to-earnings and/or low price-to-book ratios, the potential for substantial earnings and cash flow growth, strong or improving profit margins, a solid balance sheet, and good management. The portfolio managers also consider "insider" transactions, stock repurchases, effective use of innovative technologies, and exposure to growing markets. Over a period of two to three years, the optimal Portfolio holding will transition from being "out of favor" to a "growth" stock to a "momentum" stock, at which point the portfolio managers reduce or liquidate the position.

The Portfolio typically holds 30 to 40 different stocks and/or exchange traded funds. Positions generally start at 2% to 2.5% and are reduced at or before they reach 6% of the value of the account. Positions with a 20% loss are formally reviewed, and any position with a 40% loss is normally liquidated. Initial purchases have equity capitalizations between \$100 million and \$2 billion, but the managers will hold companies with larger market capitalizations. Some industries are more heavily "weighted" than others based on the managers' judgment that certain industries are substantially more attractive than others at any given time.

The portfolio managers use a combination of quantitative and qualitative research. The managers run statistical screens in an attempt to identify companies with high levels of free cash flow, strong balance sheets, "hidden" earnings, insider buying, and negative analyst sentiment but positive operational performance. Select stocks are considered for more detailed fundamental analysis and due diligence, which normally includes reviewing SEC filings, interviewing management, and examining industry research.

IMVA believes that its Small Capitalization Portfolio is differentiated from most other small capitalization alternatives by its concentration (30 to 40 positions), broad investment parameters (balance sheet and income statement valuation metrics), and long-term investment horizon.

The Small Capitalization Portfolio strives to outperform the small capitalization indexes and measures its performance against the Russell 2000 Index.

*Small Capitalization Portfolio Composite Inception Date: January 1, 1994. Performance figures, both net and gross of fees, have been examined through March 31, 2020. Please refer to the attached GIPS fully compliant presentation for a detailed explanation of performance presented. Performance returns are for the period ending 06/30/20. **One account within the net composite has an implied management fee of 100 basis points from 1/1/94 through 9/30/06. Past performance is no guarantee of future results, and no representation is made that results similar to those shown can be achieved. A complete presentation of any composite and/or a list of all composites is available upon request.

Small Capitalization Portfolio Composite

Annual Performance* Commentary

The second quarter turned out to be nearly as volatile as the first quarter, and our continuing (re)education on the unpredictability of the future, even the near future, was in full session. After falling 34% from February 19th through March 23rd, the S&P 500 Index then surged nearly 45% through early June. A variety of distinguished investors, many of whom we have cited in these letters, had to admit that their bearish commentary in late March turned out to be very wrong. As usual, and probably as no surprise to our clients, we believe good quality equities are, generally speaking, the best way for a long-term investor to navigate the usual and unusual risks we face right now. Equities provide growth potential, current yield potential, and some purchasing power (inflation) protection.

Second Quarter 2020 Performance*

Small Capitalization Portfolio (Gross)	25.3%
Small Capitalization Portfolio (Net)	25.2%
Russell 2000	25.4%

Sector Breakdown

Annualized Performance*

*Please refer to the attached GIPS fully compliant presentation for a detailed explanation of performance presented. Yearly performance returns are for the year indicated, except 2020 YTD is for period ending 06/30/20. Past performance is no guarantee of future results, and no representation is made that results similar to those shown can be achieved. * 2020 performance returns are for the period ending 06/30/20.

A. Inception of the composite was 1/1/94. Creation of the composite was 1/1/94.

B. Fee schedule: 1.00% per annum on the first \$1 million of assets; 0.75% per annum on assets greater than \$1 million. Fees are negotiable.

C. N/A for the current year signifies that the information is not available until year end. N/A for previous years signifies that the information was not required.

D. Supplemental information. In addition to composite assets, strategy assets include separately managed accounts that do not meet the criteria for inclusion in the composite and wrap accounts. Small Capitalization Portfolio model assets are managed by other firms based on model portfolios submitted by IMVA.

Investment Management of Virginia, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Investment Management of Virginia, LLC has been independently verified for the periods January 1, 1993 through March 31, 2020. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The Small Capitalization Portfolio composite has been examined for the periods January 1, 1994 through March 31, 2020. The verification and performance examination reports are available upon request.

1. Basis of Presentation

Investment Management of Virginia, LLC ("IMVA") is a registered investment adviser under the Investment Advisors Act of 1940. IMVA was originally established as Scott & Stringfellow Capital Management, Inc., a division of Scott & Stringfellow, in 1982. In March 1999, Scott & Stringfellow became a wholly owned subsidiary of Branch Banking & Trust Company (BB&T). IMVA became an independent investment adviser in July of 2000 when the principals of Scott & Stringfellow Capital Management, Inc. purchased IMVA from BB&T. Total firm assets exclude model programs. Additionally, as supplemental information, as of June 30, 2020, the firm provides models to programs managing a total of approximately \$5.24 million in assets based on those models (this figure includes the Small Capitalization Portfolio model assets and all other model portfolio assets at IMVA).

2. Composite Criteria

The Composite consists of institutional, endowment, retirement, and individual accounts. Tax-exempt and taxable accounts are included. The Composite seeks a strong total return through capital appreciation in small capitalization companies, including use of ETFs. The primary investment criteria are strong upside potential at a reasonable price. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Performance results of the Composite are based on U.S. dollar returns.

3. Calculation Methodology

The Composite results are time-weighted rates of return net of commissions, custodial fees, and any other expenses incurred in the management of accounts. Accounts may be shown gross or net of withholding taxes on foreign dividends based on the custodian. These returns have been presented both gross and net of investment advisory fees. Quarterly composite rates of return, which are net of investment advisory fees, are calculated at the account level. Net performance returns have been calculated by reducing gross performance returns by the actual investment management fees charged. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Additional information regarding policies for valuing portfolios, calculating performance and preparing compliant presentations is available upon request.

4. Comparison with Market Index

Results of the Composite are shown compared to the Russell 2000 Index. The Russell 2000 Index is comprised of the 2,000 smallest companies in the Russell 3000 Index, which measures the performance of the 3,000 largest publicly held companies incorporated in America, as defined by total market capitalization. The Russell 2000 represents approximately 1% of the Russell 3000 Index total market capitalization. For comparison purposes, the Russell 2000 is a fully invested index, which includes reinvestment of income, and the performance has been linked in the same manner as the Small Capitalization Portfolio Composite. The returns for this unmanaged index do not include any transaction costs, management fees, or other costs. The information contained in this material is based on data we have obtained from third party sources. While this information has been obtained from sources we believe to be reliable, we do not guarantee, nor are we responsible for, the accuracy, completeness, or timeliness of the information provided in this presentation. The S&P 400 Index was used prior to 12/31/00 as a comparison index. It was replaced with the S&P 600 Index on 12/31/00 because this index was a more accurate representation of the market capitalization of the securities in the client accounts. The S&P 600 Index was dropped as an index as of 3/31/12 due to low usage of that index by institutional investors.

5. SEC Advertising Disclosure Footnotes

All performance composite returns are reported net and gross of investment advisory fees charged by Investment Management of Virginia, and reflect the reinvestment of dividends and other earnings. The investment returns will be reduced by commissions, custodial fees, and any other expenses incurred in the management of accounts. Accounts may be shown gross or net of withholding taxes on foreign dividends based on the custodian. Net performance reflects the deduction of actual quarterly fees for each account in the composite with the exception of one non-fee paying account in the composite for the periods prior to 9/30/2006. An implied 100 bps fee was applied to calculate net performance for the account. Gross of fees performance returns are presented before investment management fees.

6. Additional Information

A complete presentation of any composite and/or a list of all composite descriptions is available upon request. Such inquiries should be addressed to George McVey, Investment Management of Virginia, LLC, 919 E. Main Street, Suite 1600, Richmond, Virginia 23219, or contact him through email at gmcvey@imva.net.

Past performance is no guarantee of future results, and no representation is made that results similar to those shown can be achieved. All portfolios have the potential of profit and/or loss on the investment securities.
