

## Large Capitalization Core Equity Portfolio

---

### **THE PORTFOLIO:**

Investment Management of Virginia's Large Capitalization Core Equity Portfolio investment style emphasizes high quality. On a portfolio basis, prospective equity holdings should exhibit the following characteristics:

- Sustainable operating margins
- Consistent earnings growth
- Favorable returns on equity
- Long-term financial strength
- Sound management
- Industry leadership.

In selecting stocks for inclusion in clients' portfolios, IMVA employs both macroeconomic analysis and bottom-up fundamental analysis of individual companies. Ultimately, the portfolio managers seek a diversified basket of high-quality companies in the industry sectors that appear poised for good long-term growth. Among stocks within a given industry, potential positions are screened for quality and valuation. The portfolio managers attempt to avoid altogether those companies and sectors whose prospects are less certain or whose valuation metrics appear extended. Exchange traded funds (ETFs) may also be used.

Investment Management of Virginia defines risk as permanent impairment or erosion of long-term fundamentals. Accordingly, the portfolio managers will consider selling a security based on the presence of one or more of the following conditions:

- Material earnings shortfall and/or negative earnings revisions
- Price target achieved in advance of supporting fundamentals
- Change detected in management integrity/commitment
- Good, alternative investment opportunity identified.

A typical equity portfolio includes approximately 40-50 positions.

### **Sector Breakdown:**

(At 12/31/22)

Cash	2%	Financials	12%
Materials	1%	Information Technology	20%
Industrials	10%	Utilities	2%
Consumer Discretionary	5%	Health Care	21%
Consumer Staples	12%	Communication Services	4%
Energy	10%	ETFs	1%

\*Inception of the composite was 1/1/93. Returns shown represent the performance since 1/1/96, when Bradley H. Gunter began managing the portfolio. Performance figures, both net and gross of fees, have been examined through September 30, 2022. Please refer to the attached GIPS report for a detailed explanation of performance presented. Performance returns are for the period ending 12/31/22. Past performance is no guarantee of future results, and no representation is made that results similar to those shown can be achieved. A GIPS report of any composite and/or a list of all composites is available upon request. (1) The 90 Day T-Bill return represents the risk-free rate of return.

## Large Capitalization Core Equity Portfolio Composite

### Annual Performance\*\*

### Annualized Performance\*\*

### Commentary

Over the course of the year just-ended, economic conditions softened, and all of the major indices passed through “bear market” territory. Generally, “low beta” and high dividend stocks held up tolerably, including positions in the Consumer Staples, Energy, and Utilities sectors. The “high growth” darlings of years past experienced tougher sledding, especially in the Consumer Discretionary, Technology, and Communications sectors. The primary culprits for the change in tone among various markets and the economy were inflation and Fed policy.

#### Fourth Quarter 2022 Performance\*\*

Large Capitalization Core Equity Portfolio (Gross)	12.4%
Large Capitalization Core Equity Portfolio (Net)	12.2%
S&P 500 Index	7.6%

\*Inception of the composite was 1/1/93. Returns shown represent the performance since 1/1/96, when Bradley H. Gunter began managing the portfolio. \*\*Please refer to the attached GIPS report for a detailed explanation of performance presented. Performance returns are for the period ending 12/31/22. Investment Management of Virginia, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Investment Management of Virginia, LLC has been independently verified for the periods January 1, 1993 through September 30, 2022. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Large Capitalization Core Equity Portfolio composite has had a performance examination for the periods January 1, 1993 through September 30, 2022. The verification and performance examination reports are available upon request.

### 1. Basis of GIPS Report

Investment Management of Virginia, LLC ("IMVA") is a registered investment adviser under the Investment Advisors Act of 1940. IMVA was originally established as Scott & Stringfellow Capital Management, Inc., a division of Scott & Stringfellow, in 1982. In March 1999, Scott & Stringfellow became a wholly owned subsidiary of Branch Banking & Trust Company (BB&T). IMVA became an independent investment adviser in July of 2000 when the principals of Scott & Stringfellow Capital Management, Inc. purchased IMVA from BB&T. Total firm assets exclude model programs. Additionally, as supplemental information, as of December 31, 2022, the firm provides models to programs managing a total of approximately \$0.14 million in assets based on those models (this figure includes all model portfolio assets at IMVA).

### 2. Composite Criteria

The Composite consists of institutional, endowment, retirement, and individual accounts. Tax-exempt and taxable accounts are included. The Composite's investment style emphasizes high quality, large capitalization companies, including limited use of ETFs. The Composite seeks a strong total return through capital appreciation over long-term timeframes. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Performance results of the Composite are based on U.S. dollar returns.

### 3. Calculation Methodology

The Composite results are time-weighted rates of return net of commissions, custodial fees, and any other expenses incurred in the management of accounts. Accounts may be shown gross or net of withholding taxes on foreign dividends based on the custodian. These returns have been presented both gross and net of investment advisory fees. Quarterly composite rates of return, which are net of investment advisory fees, are calculated at the account level. Net performance returns have been calculated by reducing gross performance returns by the actual investment management fees charged. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Policies for valuing investments, calculating performance, and preparing GIPS reports are available upon request.

### 4. Comparison with Market Index

Results of the Composite are shown compared to the Standard & Poor's 500 Index and to the 90-Day T-Bill Index. The Standard & Poor's 500 Index is a capitalization-weighted index, and is calculated based on a total return basis with dividends reinvested. The Standard and Poor's 500 Index is a capitalization-weighted index of 500 blue-chip U.S. companies representing the industrial, transportation, utility, and financial sectors with heavy emphasis on the industrial sector. The 90-Day Treasury Bill Index is a total return index that comes from the average yield of three-month Treasury bills. Performance has been linked in the same manner as the Large Capitalization Core Equity Portfolio Composite. The returns for these unmanaged indexes do not include any transaction costs, management fees, or other costs. The information contained in this material is based on data we have obtained from third party sources. While this information has been obtained from sources we believe to be reliable, we do not guarantee, nor are we responsible for, the accuracy, completeness, or timeliness of the information provided in this GIPS report.

### 5. SEC Advertising Disclosure Footnotes

All performance composite returns are reported net and gross of investment advisory fees charged by Investment Management of Virginia, and reflect the reinvestment of dividends and other earnings. The investment returns will be reduced by commissions, custodial fees, and any other expenses incurred in the management of accounts. Accounts may be shown gross or net of withholding taxes on foreign dividends based on the custodian. Net performance reflects the deduction of actual quarterly fees for each account in the composite. Gross of fees performance returns are presented before investment management fees.

### 6. Additional Information

A GIPS report of any composite and/or a list of all composite descriptions is available upon request. Such inquiries should be addressed to George McVey, Investment Management of Virginia, LLC, 7231 Forest Avenue, Suite 204, Richmond, Virginia 23226, or contact him through email at gmcvey@imva.net.

Past performance is no guarantee of future results, and no representation is made that results similar to those shown can be achieved. All portfolios have the potential of profit and/or loss on the investment securities.
